

## management

Frank Cullen

Chairman

Frank has held a distinguished string of senior telecommunication finance and executive positions. As a senior Finance executive in BT he was responsible for international billing, in particular financial arrangements with overseas carriers and interconnect accounting with network providers in the UK. Frank joined the cable communications sector in the mid 1990s as Finance Director, and then subsequently, Managing Director of Cambridge Cable. Following the successful sale of Cambridge Cable, Frank returned north to run ntl in Scotland. After a period of considerable growth, assisted by negotiating the largest sports sponsorship deal of its kind in Scotland, he once again headed south to lead the development of a young, but very innovative, telecoms start-up. Having successfully established Totem Communications Ltd, Frank returned to Scotland at the beginning of 2003 to found his own company FMC Solutions Ltd. Frank joined StreamFlex as Chairman in 2003.

Peter McClelland

Managing Director

The founder and driving force behind StreamFlex, Peter defined the radical product vision that is transforming flexible, high volume BSS and OSS solutions. He manages the product and company strategy. Graduating in Physics, Peter moved into software where he has specialised in software solution architecture for over 20 years. His particular interest lies in finding new and creative ways to use software to improve business efficiency. In addition to the telecommunications industry, Peter has had notable success in government and manufacturing. By the late 1990s it became clear that telecommunications were being transformed by the separation of infrastructure from services. Peter identified the market need for a radical new approach that could provide large-scale software solutions, which were capable of constantly evolving with little time and effort. The streamFlex® platform and business solutions are the result of his vision.

Bernd Neckel

Head of Business Development

Bernd is an experienced international consultant and entrepreneur. Specialising in telecom, IT and energy solutions, he brings a wealth of expertise and large personal network. He has a strong track record in assembling complex solutions and working with large global organisations at the highest level.

Mark Rigby

Consulting Director

After graduating in Electronics and Telecommunications Engineering, Mark Rigby spent his early career with a number of infrastructure, software and service provider organisations (Nortel, GEC, BT Cellnet, KSCL). Later, he went on to help establish the European office of Cygent Inc, a US based Service Management Software start-up. He then co-founded StreamFlex and set up its business development operations. Mark has spent much of his recent career in the OSS/BSS sector and has been published in a variety of trade journals. In conjunction with his work at StreamFlex, Mark currently runs his own telecommunications consultancy company.
