

## tariff optimization solutions for telecoms

StreamFlex Solutions is the specialist in tariff optimization for communication service providers.

Our proven products, process and expertise provide the most effective means to reduce churn and increase sales across all customer segments.

We supply software solutions for customer retention (reduce churn), customer acquisition (increase sales) and tariff modelling (speed up and de-risk new tariff launch). All solutions can be deployed in-house in a data centre or accessed as a service over the internet.
