

solutions

StreamFlex Solutions provides the most comprehensive, complete and convincing tariff optimisation solutions to reduce churn and increase sales. All solutions are based on our proven tariff optimisation process, delivered either directly or through our partners.

Customer Keeper is a customer retention tool to increase trust and loyalty, which delivers the right deal for your customer, right deal for you

Tariff Hunter is a customer acquisition tool, which finds the best tariff offer to meet new customer needs

Tariff Modeller is a tool for speeding up and de-risking the launch of new tariff plans and promotions

We can also provide components integrated into a wider solution. Each streamFlex product is made up from components, and these can be deployed separately or in combination into almost any target environment with minimised integration overhead through our streamFlex software platform technology.

Read our white papers for more information about the world of tariff optimisation, and blogs for a personal view.
