

partners

StreamFlex Solutions operates throughout Europe. Some projects need complementary consultancy and services work, often with local language skills. Some clients prefer to work with a local services supplier as prime contractor. They also expect their key suppliers to make them aware of innovative new products that will add-value and plug functionality gaps.

We have relationships with several international and local integration partners. We are always interested to expand our list of partners, with capabilities in any of:

- Business development

- Project inception consultancy
- Business process improvement consultancy

- Project management
- Software and business process integration
- Training
- User and technical support
- Post-implementation consultancy

To discuss partnering please contact us.
