

about streamFlex solutions

StreamFlex Solutions is the specialist in tariff optimisation for communication service providers.

Our solutions are based on our unique tariff optimisation process and software platform technology, specially designed to address bulk data problems with unmatched speed and flexibility. Solutions to important and often difficult business issues become feasible, which previously could not be done at acceptable time, cost and functional richness.

StreamFlex Solutions has offices in Scotland and Ukraine. We have provided solutions to the communication industry since 2002. Our clients range from tier-1 mobile operators through to dealers and distributors. In November 2009 we changed our name to StreamFlex Solutions from CHIL.
